## Education

---

- **Indian Institute of Technology (ISM) Dhanbad** Dec 2021 – May 2025  
*Bachelor of Technology in Computer Science* Dhanbad, Jharkhand
  - Relevant Coursework: Data Structures and Algorithms (C++), Object-Oriented Programming System(OOPS), Database Management System(DBMS), Software Engineering, Computer Networks, Deep Learning

## Experience

---

- **Graduate Engineer Trainee (Data/AI Engineer)** Aug 2025 – Present  
*Reliance Industries Ltd.* Mumbai, India
  - Developed and deployed ML models and data pipelines for product data analysis, leveraging skills in data science and machine learning.
  - Designed and implemented RAG (Retrieval-Augmented Generation) systems using vector databases, text splitters, retrievers, and Hugging Face LLM API integration.
  - Built production-grade Python backends, optimized prompt pipelines, and contributed to internal AI tools and automation workflows.
- **Backend/AI Intern** Apr 2024 – May 2024  
*Pepsales* Bengaluru, India
  - Created a Flask application and hosted it on AWS EC2, showcasing skills in backend development and cloud computing.
  - Worked on an AI platform that enables B2B SaaS sales teams to generate personalized product demos for prospects.

## Projects

---

- **Image-Based Entity Extraction with PyTesseract** | Python, PyTesseract, os, pandas  
| **Repository:IEE**
  - Employed OCR technology to extract key information from product images, demonstrating ability to work with image data.
  - Achieved 56% accuracy on the test dataset, showcasing model effectiveness in extracting relevant data despite image quality challenges.
  - Processed a large dataset, handling over 130,000 test images and identifying potential challenges.
- **Mars Landmark Detection System** | Python, TensorFlow, Keras  
| **Repository:MLDS**
  - Developed an end-to-end deep learning project using TensorFlow and Keras to detect landmarks in images of Mars, showcasing skills in machine learning and computer vision.
  - Trained a model to classify images into eight classes representing various Martian landmarks, achieving an accuracy of 89% on the test dataset.
  - Handled over 8,200 training images and 2,000 testing images, demonstrating ability to work with large datasets.

## Technical Skills

---

- Languages: C, C++, Python, SQL
- Technologies: Agentic AI, PySpark, Databricks, Azure Data Factory, Azure, GenAI, OpenCV, NLP, MLOps, Scikit-learn, Keras, PyTorch, TensorFlow, Git, Google Cloud, Data Science, Machine Learning
- Concepts: Data Structures and Algorithms, OOPS, Machine Learning, Data Science, Deep Learning, Explainable AI, Operating Systems, Agile/Scrum, Product Data Science

## Achievements

---

- JEE Advanced Rank - 2903
- JEE Mains Rank - 4616
- Amazon ML Challenge - Top 200 out of 18500 teams
- Hackfest IIT Dhanbad participant
